

AMFM76

AM/FM Radio Broadcast Fibreglass Antenna 2.6 m

- High quality AM/FM Radio Broadcast antenna
- Similar design available for VHF and AIS bands
- Omni-directional receiving pattern
- End-fed coaxial radio broadcast receiving antenna
- DC-grounded (DC-short) - antistatic
- No groundplane needed

Electrical Specifications:

Frequency	(FM/AM Radio Broadcast bands)
Impedance	75 ohm
Polarisation	Vertical

Mechanical Specifications:

Color	White and chrome
Height	Approx. 2640 mm
Weight	450 g
Mounting	On 1" threaded pole (G1"-11 thread) with Revolving Nut Kit or on optionally brackets
Materials	PU-painted glassfibre, PVC, copper and chrome plated solid brass
Operating temperature	-40C to +70C
Connector 1	UHF-female
Cable	No cable supplied
Mounting place	On mast or deck
Ingress Protection	IP66
Serial no.	On product label

Ordering information:

P/N	15076-002 (Antenna only)
P/N	15076-432 (Antenna + 1" Revolving Nut Kit)

Packing information:

Packing	Carton tube
Size	Ø 50 mm x 2.75 m
Weight	Approx. 0,5 kg
